Research Bulletin

OF THE

National Education Association

INDEX TO VOLUME XXIII, 1945

Acknowledgment: response to questionnaire of *Research Bulletin* on "The Teacher Looks at Personnel Administration," 98.
Actuarial service: value for retirement systems, 34, 39, 46.
Administrative and supervisory positions: distribution of salaries paid in 1944-45, 16–17; issue of localism, 125; median salaries paid, 20, 21; method of filling, 124–26; opinions on eligibility to, 125; salary trends, 5, 6–10; teacher opinions on methods of filling, 126.
Alcoholic beverages: expenditure increase in comparison to amount spent for schools, 81, 82, 85.
Associations: state and local membership reports, 133.
Attendance officers: median salaries paid, 20, 21.
Amusements: expenditures compared with amount spent for schools, 82.
Automobiles: expenditure decline in 1942, 81, 82.

Bangs, R. B.: reference to, 69.
Barber services: consumption expenditures in comparison with amount spent for schools, 82.
Beauty services: consumption expenditures as compared with amount spent for schools, 82.
Blose, David T.: reference to, 65.
Bradford, Ralph: statement on contribution of education to life and work, 86.
Bretton Woods Agreement: economic aspects, 87.
Brookings Institution: financial estimate for postwar educational program, 67.

Clothing: expenditure increase in comparison to amount spent for schools, 81, 82, 85.
Committee for Economic Development: estimate on postwar national income, 71.
Consumer spending: for goods and services in 1939-1944, 80, 81, 82, 85, 91; level related to public-school financing, 78; relation of education to, 86; relation to disposable income, 91; relation to net national income, 91; rise during wartime, 78–83.

Education: adequate financing lacking, 60; broadened fields thru European economic contacts, 87; equalization aid approved by President Roosevelt, 77; estimates for postwar program, 67–68; factor in demand for new products, 86; governmental responsibility in, 84; instrument in expansion of American business, 86; need for increased share of national funds, 84-87; postwar developments in, 60; quality as affected by teacher turnover, 65–66; relation to economic leadership, 60; rural and urban teacher status, 96; value of degrees commented on, 109–10.
Efficiency ratings: comments of urban teachers on, 106; degree of teacher satisfaction with present system, 106; methods of informing teachers, 106; prevalence of system, 104–107; replies to questionnaire, 105, 117; self-estimate of, 130.
Ellis, Paul W.: reference to, 75.
Enrolment: decrease during wartime, 65.
Estimates: effect of changes in price level, 68; for postwar educational program, 67–68.
Europe: effect of economic affairs upon American education, 87.

Federal Aid Highway Act of 1944: authorization of road expenditures, 77–78.
Food: expenditure increase in comparison to amount spent for schools, 81, 82, 85.
Fowlkes, John G.: reference to, 67.

Gilbert, Milton: reference to, 69.
Givens, Willard E.: forewords by, 4, 28, 60, 96.
Goods, nondurable: consumer expenditures for, 1939-1944, 78–81, 91.
Government: cost increase over national income, 72; cost of federal expenditures greater than state and local increases, 72–74; cost relation to school costs, 73, 74, 85; cost rise during crises, 72–74; federal, state, and local expenditures for 1914-1943, 90; responsibility in education, 84.

Hansen, A. H.: estimate on postwar national income, 71.
Highway expenditures: productivity as compared with school expenditures, 77–78, 85, 86.

Industry: benefits from high level of spending, 83–84.

Janitors: median salaries paid, 20, 21.
Jewelry: expenditure increase in comparison to amount spent for schools, 81, 82, 85.

Kimmel, Lewis H.: reference to, 67.
Kuznets, Simon: statement on education as a factor in expanding production, 86.

Livingston, S. Morris: estimate of postwar national income, 71.

Mayer, Joseph: estimate of postwar national income, 71.
Mitchell, Wesley C.: statement on education and consumer demand, 86.
Morale: definition of term, 100; effect of salary recognition of superior teaching, 103; effect of type of salary schedule, 108; effect on women teachers of "no-marriage rule," 115; effect on women teachers of provision of extra pay to men, 112; high and low in relation to teacher status, 136; high groups reported more helps than hindrances, 134–36, 139; high reports overbalance low, 100; relation to teacher status, 129–37; urban women's reports, 100.
Mutual health associations: formation in 1887, 28.

National income: disposable amount, 83, 91; expansibility, 78; increase exceeded by government costs, 72; meaning of term, 68–69; percentage expended for government purposes and for public schools, 1929-1943, 73; percentage expended for public schools in 1929-1944, 70; postwar estimates, 71; relation to consumer expenditures, 78, 79, 83, 91; relation to production level, 70–71; relation to total tax collections and school expenditures for 1929-1943, 89; use for adequate school support, 68–72, 84–87.
National Education Association: advocate of equal pay for equal work, 110; biennial salary surveys, 4, 5; favoring equal pay for elementary and secondary teachers, 107; in favor of abolishment of discrimination against married women, 112; members' response to questionnaire, 98; prediction of postwar school expenditures, 67, 71; reference to, 29; results of salary studies, 4.
National Education Association, Committee on Economic Status of Teacher: reference to, 131.
National Education Association, Department of Classroom Teachers: cooperation with Research Division on questionnaire, 97.
National Education Association, Department of Elementary School Principals: salary schedule proposed by Committee on Standards in 1928, 14.
National Education Association, Educational Policies Commission, financial estimate for minimum educational program, 67, 68.
National Education Association, *Research Bulletin*: reference to, 5, 112.
National Education Association, Research Division: acknowledgment for cooperation in study, 98, 147; biennial salary surveys since 1922-23, 4, 5; financial estimate for postwar educational program, 67–68; questionnaire form on city-school salaries, 23; reference to, 61, 65, 97; salary estimates, 132; special salary tabulations, reference to, 4; statistics on teacher retirement systems, 29.
National Planning Association: estimate of postwar national income, 71.
National Resources Planning Board: financial estimate of postwar educational program, 67.
Nurses: median salaries paid, 20, 21.

Oil and gas: expenditure decline in 1942, 81, 82.

Pensions: *See* Retirement.
Perloff, H. S.: estimate on postwar national income, 71.

National Planning Association: estimate of postwar national income, 71.
National Resources Planning Board: financial estimate of postwar educational program, 67.
Nurses: median salaries paid, 20, 21.

Oil and gas: expenditure decline in 1942, 81, 82.

Pensions: *See* Retirement.
Perloff, H. S.: estimate on postwar national income, 71.

Personnel administration from teacher's standpoint: analysis of report, 98; approval of policies based on familiarity, 117; attitudes and morale, 100–101; attitudes toward teaching, 99; continued study requirements, 120–21; cooperating centers, 147; development of questionnaire, 97; efficiency ratings, 104–107; employment of married women, 96, 112-14; favorable and unfavorable attitudes toward teaching, 100; high and low morale, 100; importance to community and children, 97; methods for recognizing superior teaching, 102; methods of filling administrative and supervisory positions, 124–26; opinions on seven issues on which local practice was not known, 119–28; physical examinations, 119; place in educational planning, 96; preparation schedules versus position schedules, 107–10; procedure and scope, 97–98; relationship between local practice and teacher opinion on six issues, 101–18; response to questionnaire, 97, 147; salaries paid compared to those needed, 132; salary differentials for men and dependency, 110–12; school division and subject taught, 129; sick-leave provisions, 119–20; significance for school personnel administration, 138–39; summary of teacher opinion on seven unfamiliar issues, 127–28; summary of teacher status and morale, 136–37; summary on local practice and teacher opinion, 116–18; teacher participation in policy-making, 126–27; teacher status and morale, 129–37; tenure and dismissal, 121–24; termination of services of older teachers, 124; written examination in teacher selection, 114–16.

Physical examinations: opinions of teachers on requirement, 120; policies on, 119.

Policy-making: teacher participation in, 126–27; work of administrative council, 127.

Population groups: basis for study of city-school systems, 5.

Postwar: balance between income and production level, 70; broadened basis for economy, 86–87; consumer expenditures, 83–84; effect of price level on cost of educational program, 68; estimates for educational program, 67–68; national income estimates, 71; public expenditures, 77; rising trend of school expenditures, 84.

President Roosevelt: approval of federal aid for educational equalization, 77.

Principals: distribution of salaries paid in 1944-45, 14–15; median salaries paid, 20, 21; salary trends, 6–10; teacher opinions on eligibility requirements, 125.

Questionnaire: on state and local teacher retirement systems, 52–55; on teacher's view of personnel administration, 97–98, 147.

References: school expenditures in war and peace, 65, 67, 69, 71, 77, 78, 81, 83, 86; teacher retirement systems, 29.

Retirement: active membership in systems, 33, 35; administrative costs, 45–49; allowances paid, 38–40; benefits of sound system, 50; benefits of teacher systems as compared with federal social security, 28; clerical requirements, 45–46; comparison of refunds to total disbursements, 36; contributions from public sources, 36, 37; death benefits, 38; definition of terms, 42, 54; disability allowances, 38, 44; distribution of administrative costs, 47–48; distribution of disbursements, 36, 38; extent of teacher protection, 29–31; financial statistics, 39; fiscal summary of systems, 41; fundamental principles, 50; history of old-age provisions, 28; ideal plan for, 36; income from interest, 36, 37; investments of systems, 36, 42; joint-contributory plans, 29–30; largest single allowances paid, 40; legislation trends, 50; liabilities, 39, 42; local pension plans, 30; members' contributions, 37; membership statistics, 32–34, 35; miscellaneous fiscal data, 42; noncertificated employees' coverage, 50; number and salaries of administrative staff of systems, 48–49; number for disability, 32, 33, 35; number for superannuation, 33, 35; number of deaths prior to, 33, 35; number of withdrawals prior to, 32, 33, 34, 35; pension plans, 30; possibility of extension of federal social security to teachers, 28; questionnaire for gathering data, 52–55; reciprocity between systems, 50; reserve basis for, 36, 39; selected references on, 29; sources of income, 36–37; staff requirement, 45–46; states with and without old-age protection for teachers, 31; statewide teacher retirement plans listed by states, 29, 30; superannuation or service allowances, 38, 43; trend toward state plans, 30; withdrawal allowances, 38. *See also* Social security.

Ruml, B.: estimate of postwar national income, 71.

Salaries: administrative staff of teacher retirement systems, 48–49; amount paid compared to amount needed, 132; comments on desirability of equal pay for elementary and secondary teachers, 107–17; differentials for men and dependency, 110–12, 113; extra pay to men as affecting morale of women teachers, 112; higher for superior teaching, 101–104; increase with size of city, 13; opinions on differentials for sex and for dependency, 111, 113; purchasing power, 1944-45, 65; received and needed relationships, 133; slight rise during World War II, 64; urban comments on equal pay for elementary and secondary teachers, 108, 117. *See also* Salary schedules.

Salaries of city-school employees, 1944-45: comparisons between positions and levels, 20; distribution of salaries paid administrative and supervisory officers, 16–17; distribution of salaries paid other school employees, 19; distribution of salaries paid principals, 14–15; distribution of salaries paid secretarial and clerical employees, 18; distribution of salaries paid teachers, 12–13; forms and definitions used in collection of data, 23; median, explanation of term, 6; median salaries paid administrative and supervisory officials, 20, 21; median salaries paid and index relationships, 1930-31 and 1944-45, 20–21; median salaries paid attendance officers, 20, 21; median salaries paid elementary teachers, 20, 21; median salaries paid janitors, 20, 21; median salaries paid kindergarten teachers, 20; median salaries paid nurses, 20, 21; median salaries paid principals, 20, 21; median salaries paid secretarial and clerical employees, 20, 21; median salaries paid superintendents, 20–21; method of making survey, 5; number of school systems included in study, 5; range and distribution, 12–14; sample section from questionnaire form, 23; size of sample, 5; status of salary scheduling, 22; trends in salaries, 1930-31 to 1944-45, 5, 6–11; trends in salaries in cities of various population groups, 6–10; wartime adjustments, 22. *See also* Salary schedules.

Salary schedules: basing on preparation rather than on position, 14; differential plans, 110; effect on teacher morale, 108; extent to which bonuses or salary adjustments were paid, 22; noncompetitive basis for, 101; number of city-school systems reporting various types of, 22; preparation versus position type, 107; revisions since 1942-43, 22; "single" system, 109; trend toward preparation type, 107; type of, 22; use of efficiency ratings for, 106; wartime adjustments, 22. *See also* Salaries of city-school employees, 1944-45.

School expenditures in war and peace: assumption of increased responsibility by federal and state governments, 76–77, 85; benefits of public and private spending, 83–84; comparisons, 63; consumption expenditures for selected goods and services, comparisons in 1942, 82; decline due to reduction of capital outlays, 63–64; decline during World War II, 63; effect of changes in price level on postwar estimates, 68; effects of war, 63; estimates, 67–68, 88; expenditures for 1870-1943, 88; federal increases greater than state or local, 72–74; growth of public expenditures, 72–78; in two depressions, 64; in two war periods, 66; increase in per pupil cost, 65; increase in teachers' salaries and current administrative costs, 64; increase of federal and state participation in support of schools, 77, 85; lag in comparison with rise in national income, 60; lowered quality related to higher real cost, 65–66; need for adequate school support, 84–87; no decline during World War I, 63; part of national product used for war, nonwar, and school purposes, 79; percentage of national income, 1929-1944, 70; percentage of national income expended for government purposes and for schools, 1929-1943, 73, 85; percentage of total tax collections, 1914-1943, 76, 89; postwar consumer expenditures, 83–84; postwar public expenditures, 77; postwar school costs, 67–68; prewar and wartime rise, 72–74; productivity of, 77–78, 86; relation to government costs, 74, 85; relation to national income and total tax collections for 1929-1943, 89; relation to total tax collections, 74–76, 85; schools and consumer spending, 78–84; schools' share of national income, 68–72; schools' share of national income too low, 71–72; summary, 84–87; trends, 1870-1943, 62; trends in government expenditures, 1930-1943, 75, 85; uncertainty of postwar policies, 61.

Schools: equalization aid, 77; share of national income, 68–72.

Secretarial and clerical employees: distribution of salaries paid in 1944-45, 18; median salaries paid, 20, 21.

Sick leave: opinions on methods for handling, 121; provisions for teachers, 119–20.

Social security: difficulties in application to teachers, 28; possibility of extension to teachers, 28.

Social Security Act of 1935: *See* Retirement, Social security.

Sonne, H. C.: estimate of postwar national income, 71.

State teacher associations: membership reports, 133.

Statistics of state and local teacher retirement systems, 1943-44: administrative expenses, 45–49; allowances paid, 39–40; analysis of disbursements, 36–39; assets, 41, 42; comparison of withdrawals to retirements, 32, 34; contributions from public sources, 36, 37; costs per member, 46; definition of terms, 52, 54; disability allowances, 38, 44; distribution of administrative costs, 47–48; distribution of disbursements, 36, 38; extent of teacher retirement protection, 29–31; financial transactions, 34–40; fiscal summary, 41; general financial statistics, 39; income,

37, 41, 42; inquiry forms, 52–55; last membership year, 34; liabilities, 39, 42; median allowances for superannuation and disability, 40; members' contributions, 37; membership losses, percentage, 34; membership statistics, 32–34, 35; method of assembling data, 32; miscellaneous fiscal data, 42; number and salaries of administrative staff, 48–49; organization of report, 29; reserve basis for, 36, 39; sources of income, 36, 37; staff requirement, 45–46; summary, 50–51; superannuation or service allowances, 38, 43; terminated memberships, 32–33, 35; total enrolments, 32, 33; value in launching new systems, 29, 34.

Superintendents: median salaries paid to, 20, 21.

Taxation: local, state, and federal tax collections for 1914-1945, 89–90; percentage of tax collections expended on schools in 1914-1943, 76; relation of school costs to tax collections, 74–76; relation of total tax collections to national income and school expenditures for 1929-43, 89.

Teachers: attitudes toward teaching, 96, 99, 100; average salary increase, 1939-1943, 65; benefits received from retirement systems, 50; comments on desirability of equal pay for elementary and secondary schools, 107–17; comments on equal pay for elementary and secondary schools, 108, 117; comments on salary differentials for men and for dependency, 113; comments on selection by written examination, 116, 117; comparison of number of withdrawals to number of retirements in state and local systems, 32, 34; comparison of rural and urban attitudes toward teaching, 99; conservative opinions valuable to school system, 138–39; degree of satisfaction with present rating system, 106; dependency load decreasing, 131; dependency patterns most frequently reported, 132; distinguishing traits of high-morale group of urban women, 137; distribution of salaries paid in 1944-45, 12–13; effect of familiarity with policy on approval of policy, 117; effect of turnover on school quality, 65–66; emergency certificates for, 66; employment of married women, 96, 112–14; enjoyment of profession, 96, 99; equal pay for equal work, 110; experience and preparation, 129–30; family allowances, 110, 117; health reports, 131; helpful items in low- and high-morale cities, 134–36; helps and hindrances to good teaching, 133, 134–36; high morale reports overbalance low, 100; hindrance items in high- and low-morale cities, 136; largest single retirement allowance paid to, 40; marriage status, 96; married number increasing, 131; membership in professional associations, 133; membership statistics in retirement systems, 32–34, 35; men's and women's attitudes contrasted, 99–100; methods for being informed of ratings, 106; morale effect of type of salary schedule, 108; morale effect on women of extra pay to men, 112; morale relationship to school division and subject taught, 129; Negro proportion in U. S., 130; "no-marriage rule" as affecting morale of women, 115; old-age plans of past, 28; old-age provision by states, 30–31; opinions as related to local practice, 101–18; opinions based on local practice, 103; opinions on eligibility to administrative and supervisory positions, 125; opinions on employment of married women, 114, 115, 118; opinions on fixing age for compulsory retirement, 124; opinions on local methods of filling administrative and supervisory positions, 126; opinions on participation in policy-making, 127; opinions on requirement of evidence for professional growth, 122; opinions on salary differentials for sex and for dependency, 111; opinions on tenure and dismissal of teachers, 123; part in policy-making, 126–27; percentage foreign born, 130; percentage membership in NEA, 98; percentage native born, 130; personal status, 130, 142–46; physical examinations, 119; point of view as basis for adjustments in administrative policy, 97; professional growth requirements, 120–21; professional preparation rewards, 109; professional status of those answering questionnaire, 142–46; proportion with and without old-age protection, 30–31; purchasing power of dollar, 1940-1945, 65; rapid-turnover relationships, 4, 65–66; reasons for withdrawal from retirement systems, 32, 34; region and school system of those answering questionnaire, 140; response to questionnaire, 97–98; retirement administrative costs per member, 46; retirement plans, 124; rural-area inequalities, 136; salary comparisons for elementary and secondary schools, 13–14; salary differentials for men and dependency, 110–12; salary needs, 132; salary raises during wartime, 64; salary received compared to salary needed, 132, 133; salary recognition as affecting morale, 103; salary recognition for professional preparation, 109–10; salary recognition for superior teaching, 101–104; salary rise in comparison with factory workers, 84; salary rise less than other wage rates, 65; salary trends, 5, 6–11; school division and sex of those answering questionnaire, 140; selection by written examinations, 114–16; self-estimate of efficiency rating, 130; sick-leave provisions, 119–20; status and morale, 129–37; status in relation to high and low morale, 136; status in rural and urban areas, 96; tenure and dismissal policies, 121–24; termination of services because of age, 124; urban responses on salary recognition for superior teaching, 104, 117; wartime salary adjustments, 22; weighted and unweighted summaries of replies, 141; withdrawals from retirement systems, 32, 33, 35.

Teaching: attitudes toward, 96, 99, 100; discrimination against married women, 112–14; helps and hindrances listed, 133, 134–35; merit classes and schedules for recognition, 101; methods for recognizing superior work, 102; salary recognition for superior work, 101–104.

Tenure and dismissal: opinions of teachers, 123; policies, 121–24.

Tobacco: expenditure increase in comparison to amount spent for schools, 81, 82.
